

Social Login for Magento 2

1. **Upload Package:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added.

2. **Install extension:** After the successful upload of the package you have to run the commands on Magento2 root directory via SSH

“php bin/magento setup:upgrade”

“php bin/magento setup:static-content:deploy”

3. **Clear Caches:** This can be done from the admin console by navigating to the cache management page (System->Cache Management), selecting all caches, clicking 'refresh' from the drop-down menu, and submitting the change. Logout and login back in Admin.

4. **Configuration settings for Social login:**

Go to Admin->System->Configuration->Scommerce Configuration->Social Login->General

- a. **Enable:** Set yes to enable the module.
- b. **License Key:** Enter the License key provided by Scommerce Mage.
